

Ulysses East Rand Chapter

INFLATABLE TENT

A new air pole technology or inflatable pole technology has drastically improved the efficiency of the rapid pitch tent, with the development of the inflatable tent. The inflatable tent uses air rise technology to pitch the tent. Basically this means you hook the tent inlet valve to a pump, switch it on, and within minutes the inflatable poles have done all the work for you and pitched the tent, without a metal pole in sight. It is very rapid and straight forward.
